## **General Terms**

These general terms ("Terms") apply to the purchase of products from Enrad AB, (company reg.-no. 556747-1395) ("Enrad"). As general delivery conditions, General Conditions for the Supply of Mechanical, Electrical and Electronic Products issued by Orgalime ("Orgalime S 2022") applies, with any additions and modifications stated in these Terms. By either ordering products from Enrad after receiving these Terms, or by signing these Terms, the buyer of products from Enrad ("Customer") accepts both Orgalime S 2022 and these Terms. If the Customer has previously accepted the applicability of Orgalime S 2022, the provision of these Terms shall not be interpreted as Orgalime S 2022 being inapplicable should the Customer not be bound by these Terms.

## **Responsibility for installation**

In accordance with Orgalime S 2022, Enrad has no obligation to perform the installation of the product.

## **Training and information**

In addition to Orgalime S 2022, Enrad undertakes to assist the Customer during the installation of the product. Enrad's commitment means, within reasonable scope, to train the Customer's personnel so that they can install the product. Enrad also undertakes to answer questions regarding the product that are important for its installation. The purpose is to give the Customer the best possible conditions for achieving maximum benefit from the product and to reduce the risk of incorrect installation. Unless otherwise agreed, Enrad has the right to charge reasonable compensation for such advice.

## **Enrad's liability for defects**

According to Orgalime S 2022 section 11, Enrad is not responsible for defects caused by circumstances that have arisen after the risk for the product has passed to the Customer. Enrad's liability does not cover defects resulting from incorrect use of the product or incorrect installation. Enrad's commitments under these Terms to provide training and answer questions do not extend Enrad's liability for defects under Orgalime S 2022. Enrad is not responsible for ensuring that the installation of the product is performed correctly. The obligations regarding training and information therefore under no circumstances mean that Enrad assumes responsibility for the Customer's installation or for defects in the product due to incorrect installation, except if and to the extent that such defect has clearly arisen as a result of Enrad's paid consultancy to the Customer. Under no circumstances is Enrad liable for indirect or consequential damage, such as loss of profit.
